

Quality Policy

Cellula Robotics Ltd. is an innovative engineering company specializing in automated and telerobotic systems.

Cellula's success is dependent on its skilled staff, its close working relationships with its customers, and its culture of continual improvement and innovation. We strive to anticipate, identify, and exceed all appropriate objectives and requirements: customer-driven, regulatory, and those defined by our Quality Management System.

By adhering to these principles, we endeavour to always bring the best value to our customers while providing tools and infrastructure for the future.
